Summary

Software Engineer with 3+ years building and scaling enterprise web applications and APIs in **.NET Core, MVC, and microservices**. Owned ~80% of a company-wide CRM platform — now live in production — that automated the entire membership lifecycle and is used daily across sales, membership, and customer-service teams. Strong in end-to-end ownership, complex third-party integration (**SAP, payment gateways, shipping carriers**), and fast, reliable production support. **Best Performer, Software Engineering — 2024**.

Professional Experience

Software Engineer, Wadi Degla Clubs S.A.E

Jul 2023 – Present · Maadi, Cairo

Build and maintain the back-end of the company's core internal platforms using .NET Core Web API, MVC, and a microservices architecture.

Club Management System (CRM) — *flagship platform, ~80% ownership*

- Architected and delivered the majority (~80%) of a company-wide CRM that **automates the full membership lifecycle**: lead capture → sales assignment → down-payment opportunity → applicant creation and interviews → automated membership-number generation and activation.
- Extended the platform with membership-change flows (separations and additions to existing memberships), **reporting dashboards** for sales and membership teams, and an internal **help-desk ticketing system** for customer service.
- Integrated the system with **SAP** to keep customer, sales, and financial data synchronized across the business.
- Shipped to production and **praised across departments** for replacing manual workflows with faster automated ones; owned post-launch stability with rapid production fixes.

Sports Reservation System (SRS)

- Led the back-end revamp in .NET Core Web API using **N-Tier architecture** and design patterns (**Strategy, Factory**), and delivered new features that improved the reservation experience.

Payments, Renewals & Integrations

- Integrated the **Paymob** payment gateway to streamline member checkout; built **SAP-integrated** membership renewal and a shipping service integrated with the **Mylerz** carrier for membership-card delivery.

Support & Mentorship

- Supported production microservices end-to-end — troubleshooting, root-cause analysis, and cross-team coordination with Customer Service, Accounting, Sports, Operations, and Sports Admin teams.
- Interviewed junior candidates and **hired two talented engineers**; mentored new team members through code reviews, bug tracing, and onboarding.

Education

Professional Diploma — Web Development & BI · Information Technology Institute (ITI), MCIT

Oct 2022 – Jun 2023

Ranked 1st in track. Graduation project — **Bug Tracking System**: built authentication, authorization, and admin-view APIs in .NET Core Web API / N-Tier.

B.Sc. Computer Science · Menofia University

Sep 2018 – Jul 2022 · Grade B

Graduation project (A+) — **Healthcare Mobile App**: authentication and Flutter services (push notifications, location tracking, in-app calling) on Flutter/Firebase.

Technical Skills

Languages: C#, C, C++, Java, JavaScript, Dart

Databases: SQL Server, MySQL, MongoDB, Firestore, Redis

.NET: .NET Core, Web API, MVC, Razor

Front-End: Angular, HTML5, CSS3, Bootstrap, jQuery, ES6

Architecture: OOP, DS & Algorithms, Design Patterns, N-Tier, Clean Architecture, Microservices

Tools: RabbitMQ, Hangfire, AutoMapper, NUnit, ElmahCore, Health Checks

Practices: Git (branching, PR reviews), Azure DevOps, CI/CD

AI & Agentic: Daily use of Claude, Cursor, GitHub Copilot & ChatGPT for code generation, rapid debugging, root-cause analysis, and architecture review.

Additional Projects

- Connect 4 Game** — desktop multiplayer game in C# / .NET Framework using threading, FileStream, and TCP socket programming.
- Stores Management System** — desktop app in C# with Entity Framework, SQL Server, and stored procedures.

Leadership, Training & Languages

- MUFIX Community** — Head of PR Team (2019–2021).
- Training:** Programming Problem Solving (Coach Academy); Java Programming & Software Engineering Fundamentals (Coursera / NTL).
- Languages:** Arabic (Native) · English (Professional working proficiency).
